

INSTRUCTIONS FOR USE
Elastic elbow support
Product code: TGO-C OSL 904

1. Characteristics

Elastic elbow support is made of seamless orthopaedic compression fabric. Anatomical shape is properly fitted to the elbow joint, affects the direction of compression and precise stabilization. Modern and spatial fabric is air permeable and removes excessive heat and moisture limiting the development of bacterial flora.

2. Application

Elbow support is used to stabilize the joint and soothe pain which occurs in physical strains i.a. in sport.

Indications for use:

- Pain syndrome of joints caused by overloads and micro-injuries
- Minor twists and strains of ligaments
- To prevent overloads and injuries

Contraindications:

Do not use in case of:

- Skin abrasion
- Eczema
- Wound and other skin injuries
- After application of warming gel or ointment
- Individual contraindications which were determined by the doctor during interview and physical examination

3. Notes

Timago International Group does not bear responsibility of improper maintenance of the product, failure to comply safety regulations and misuse.

4. Fitting instruction

- Pull the elastic support on from the bottom to the elbow joint.

Note! Only properly matched size guarantees reduction of pain.

Note! Long-term use may result in reduction of muscle tone and dysfunction of the limb.

5. Technical data
